

Uni-Trol AC-134A - Air conditioning charging station

Full automatic A/C station for air conditioning systems with R134A refrigerant. Complete vehicle database with information on the refrigerant nominal amounts for each car models. Equipped with used and new oil scales, 7-inch touch-display with a clear menu. Modern housing design provides functionality and easy access to all machine components.

Technical Data

Refrigerant	R134A
Tank capacity	10
Refrigerant weight accuracy	± 10 g
Oil scale accuracy	± 3 g
Vacuum pump	120l/min
Pump efficiency	3/8HP
Used oil bottle capacity	400 ml
New oil bottle capacity	250 ml
Length of charge hoses	3 m
Data base	Yes
Dimensions	630/640/1050 mm
Weight	88
Electric supply	230 V / 50Hz

Station functions:

- refrigerant recovery,
- oil recovery,
- vacuum,
- leak test,
- refrigerant filling,
- oil filling,
- internal system rinsing,
- hybrid and electric vehicles with POE oil service.

Advantages:

Large, easy-to-read 7-inch touch-display.

Database with information on refrigerant nominal amount.

Standard equipment:

- printer,
- charge hoses (3m),
- scale lock during transportation,
- tank heating belt,
- refrigerant scale calibrating weight.
