

PK-P

The **PK-P pneumatic wheel lift** is an efficient solution for lifting and securing the wheels of passenger cars, off-road vehicles, and SUVs during repair work. The lift features a pneumatic lifting mechanism that allows the user to safely and quickly raise the wheels. Thanks to its robust construction, the PK-P is an essential tool in every automotive workshop or garage, ensuring convenience, reliability, and increased work productivity.

Dane techniczne

Capacity	65 kg
Lifting height	≤ 1,2 m
Motor power	Pneumatyczna
Pneumatic power supply	8 bar
Charging time	-
Dimensions	750/700/1650
Weight	60 kg
Control	Pneumatyczne
