

Air decontaminator with O3 sensor DK-20

The air decontaminator with O3 sensor DK-20 is a revolutionary solution that improves air quality indoors. This compact yet powerful device, designed based on the latest technology, effectively combats air pollutants, allergens, and unpleasant odors in any environment. Equipped with an intelligent sensor, it constantly monitors the ozone level, ensuring safe and optimal air purification. Whether you are at home or in the office, the DK-20 provides a healthier and more comfortable living or working space for you and your loved ones.

Technical Data

Ozone output	20 g/h
Efficiency	304 m3/h
Ozone generation method	Wyładowania koronowe
Air flow	304 m3/min
Cooling	Powietrzem
Electric supply	230V / 50-60 Hz
noise level	55 dB (A)
Durability	> 20000 h
Humidity	< 85%
Working temperature	5 - 40 C
UV lamp	Tak
Dimensions	500x360x230
Weight	10 kg
Working environment	Pomieszczenie zamknięte
